Subject: Announcement: Large Generator Interconnection Transition Request Window Now Open

Bonneville Power Administration

Requested Action: Submit Transition Request applications by Sept. 28, 2024

Subject Description:

As outlined in Attachment R (Large Generator Interconnection Transition Process) in BPA's Open Access Transmission Tariff, the Transition Request Window opened on June 30, 2024 and will close on Sept. 28, 2024. An Interconnection Customer with a Transition Project, meaning a valid Interconnection Request submitted by Nov. 22, 2023, that does not have an executed Standard Large Generator Interconnection Agreement by June 30, 2024, must submit a Transition Request during the Transition Request Window for that project to be studied in the Transition Process.

Transition Projects that meet the definition of a Late-Stage Project, as outlined in Attachment R, are eligible to apply to 1) continue through the remaining Interconnection Facilities study and agreement execution process or 2) be studied in the Transition Cluster Study. Transition Projects that do not meet the definition of Late-Stage Project are eligible to apply to participate in the Transition Cluster Study. Interconnection Requests that have completed all interconnection studies by June 30, 2024, are not eligible to submit a Transition Request and bypass the Transition Process.

The eligibility status of each Interconnection Request in BPA's generator interconnection queue as a Late-Stage Project, a project that may only apply to the Transition Cluster Study, or a bypass project, is available [here](#).

Submit signed Transition Requests, including the Transition Request [form](#) and required documentation as outlined in Attachment R and BPA's business practices, as email attachments to Interconnection@bpa.gov. Include your Transmission Account Executive on email submittals. The time BPA receives the request in the email inbox will be the official time stamp.

The Transition Request form is available [here](#).
